WASHING AND TREATING

To guarantee the highest quality standards, ACERBIS carries out a series of tests on the raw materials used in each garments, in its internal and accredited laboratories. Our technicians recommend strictly following the instructions on the maintenance label. This will ensure that the performance characteristics of the fabrics will last over time.

GENERAL RECOMMENDATIONS MAINTENANCE

- Prevent dirt from getting into the fabric.
- Wash the garment as soon as possible.
- In case of particularly stubborn stains, put some detergent directly on the affected area, leave it to act for a few minutes and then proceed with the washing operations indicated on the maintenance label.
- If the garment is particularly dirty, allow it to soak with water and detergent in a basin for a couple of hours before proceeding with the washing operations indicated on the maintenance label.
- Wash colored garments separately and wash light colored garments separately from dark ones.
- It is advisable to turn each garment inside out before washing.
- Before washing check that all zips are closed and fastened correctly to prevent other garments from coming into contact with these accessories, risking injury to the fabric.
- Wash separately garments and Velcro accessories.

APPLICATION INSTRUCTION FOR TRANSFER PRINTS

- Suggested maximum application temperature: 150°.
- Dwell time and pressure according to the recommendation of the transfer print supplier.
- After print application, fabric has to be cooled down before being removed from the iron plate.
- White and light colored heat transfers must have an anti-migration back-up layer when applied on colored fabrics.
- Fabrics may not be pressed directly in order to avoid pressing marks.
- Insert barrier material between the garment and the press for protection.
- It is not recommended to use the press where a print has previously been applied, as if it were to come into contact with the heat of the press, the print itself could be damaged.
- White and colored garment parts should not be in direct contact during print fixation.
- It is recommended to always use a rubber anvil in the size of the heat transfer to avoid that hot heat plate is touching the whole fabric.

ISTRUZIONI PER L'APPLICAZIONE DI TRANSFER PRINT

- La temperatura massima consigliata per l'applicazione è 150°.
- Pressione e temperatura devono essere modulate in base alle indicazioni del fornitore della stampa.
- Dopo l'applicazione della stampa, il tessuto deve essere raffreddato prima di essere rimosso dalla piastra.
- Le stampe bianche o di colore chiaro devono avere uno strato anti-migrazione sul retro, se applicate su tessuto colorato.
- Il tessuto non deve essere pressato direttamente senza strati intermedi perché potrebbe riportare segni dovuti al calore.
- Inserire sempre uno strato che faccia da barriera tra il tessuto e la pressa.
- Si sconsiglia di utilizzare la pressa dove precedentemente è stata applicata una stampa, in quanto se dovesse entrare in contatto con il calore della pressa la stessa stampa potrebbe risultare danneggiata.
- Parti bianche e parti colorate dello stesso capo non devono entrare in contatto diretto durante l'utilizzo della pressa.
- Si consiglia di utilizzare sempre un supporto in gomma della dimensione della stampa da posizionare sotto al tessuto, in modo che la pressa calda non entri in contatto con tutto il tessuto.

ACERBIS DRY SYSTEM

A high breathability therefore promotes air circulation between the external environment and the garment itself. For optimal comfort during sports (and more), it is always essential to wear garments whose fabrics are perfectly breathable. Sweat must dry quickly so as not to remain in contact with the skin for a long time, thus allowing natural body heat regulation, reducing energy expenditure, providing great comfort and keeping the skin always fresh and dry. Garments made with the Acerbis Dry System treatment are perfect both in winter, because they help keep the muscles warm, and in summer, because they dry quickly, allowing you to maintain a feeling of freshness.

ACERBIS DRY SYSTEM

Per un comfort ottimale durante l'attività sportiva (e non solo) è indispensabile indossare capi i cui tessuti siano perfettamente traspiranti. Il sudore deve infatti asciugare rapidamente per non rimanere a lungo a contatto con la pelle: in questo modo è possibile ottenere una naturale termo-regolazione corporea, riducendo il dispendio energetico, garantendo maggiore comfort e mantenendo la pelle sempre fresca ed asciutta. I capi realizzati con il trattamento Acerbis Dry System sono dunque perfetti sia in inverno, perché aiutano a mantenere caldi i muscoli, sia in estate, perché si asciugano rapidamente consentendo di mantenere una sensazione di freschezza.

ANTIBACTERIAL TREATMENT

A treatment carried out on the fabric and designed to counteract bacterial proliferation. SUBLIMATION PRINTING

Sublimation printing is an indirect printing process that involves the design being transferred to the fabric through sublimation. It is realized thanks to special printers that use specific sublimation inks to impress the desired design on a special support. Subsequently, the printed paper is coupled to the fabric and the design is transferred using machines that, by exerting the right pressure at the correct temperature, sublimate the colors by impressing the desired design on the fabric.

SUBLIMATION PRINTING

La stampa sublimatica è un processo di stampa indiretto che prevede che il disegno venga trasferito sul tessuto attraverso la sublimazione. Viene realizzato grazie a particolari stampanti che utilizzano specifici inchiostri sublimatici per imprimere su un apposito supporto il disegno desiderato. Successivamente la carta stampata viene accoppiata al tessuto ed il disegno viene trasferito utilizzando macchinari che, esercitando la giusta pressione alla corretta temperatura, fanno sublimare i colori imprimendo il disegno desiderato sul tessuto.

EMBOSSED

The term embossing refers to a particular relief printing technique. The fabric is introduced into specific machines which, by exerting the right pressure on it at the right temperature, print the intended design by creating a glossy and matt effect.

EMBOSSED

Con il termine embossing si indica una particolare tecnica di stampa a rilievo. Il tessuto viene introdotto in specifici macchinari che, esercitando sullo stesso la giusta pressione alla corretta temperatura, imprimono il disegno desiderato creando un effetto di lucido e opaco.
